very good.... At this point, while it's a competent infinite runner it needs more content and more variants. Will check back for future updates and update my review to reflect those updates.

First impressions and more recommendations to the developer here:

<https://youtu.be/VgTKzckBPnqs>. Liked that runner did loved some of the traps

still some work to do but yes if you are in those types of games then feel free to support them. Looks like a "Pepsi Man" rip-off to me, which is positive, but in its current state it's much more slower, repetitive and boring.. "Upgrade your hero. Will he make it to the end? Let's see! Enjoy dynamic gameplay, atmospheric soundtrack and sci-fi setting."

This entire line is a lie. There's no 'dynamic gameplay', you literally press w, and then avoid falling into pits of lava, running into walls, or missing the button that opens the door... Not even worth the \$0.59 (Canadian) I paid for it. This is one of 5 games the developer has published that are in early access.
